

Delivery Checking System

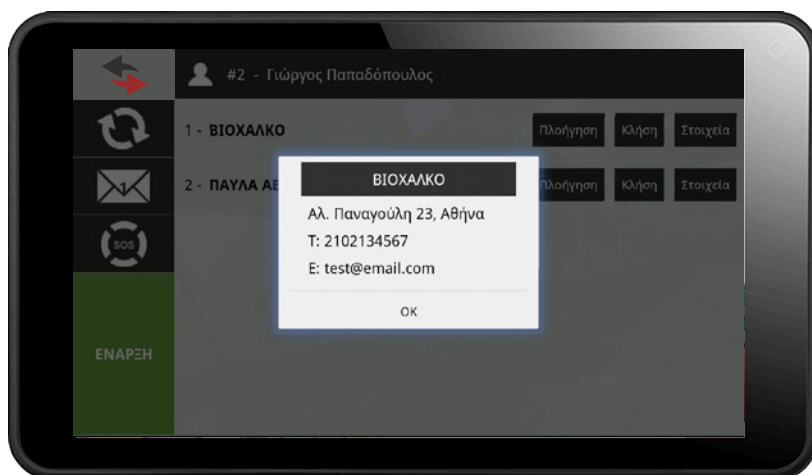

SMART | MAGNA
SOLUTIONS

PavlaPOD

Understanding the growing needs of all businesses in the field of logistics, we created the application Pavla POD (proof of delivery) system.

Pavla POD is an integrated system for real-time checking of product delivery while giving full control to the business manager with detailed reports.

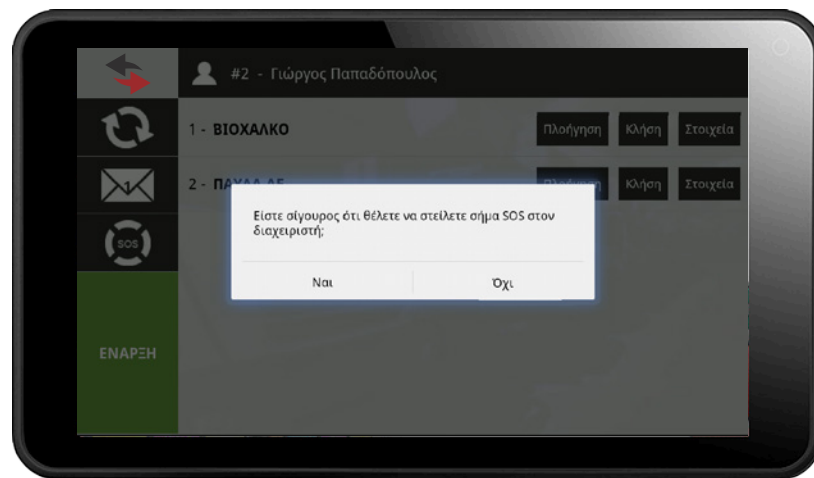

Process

The driver has a smart device (smartphone - tablet) with the Pavla POD application installed. By logging in using a unique password, the driver views the deliveries of the day.

The driver must press the relevant button and start his shift in order to be able to use the system.

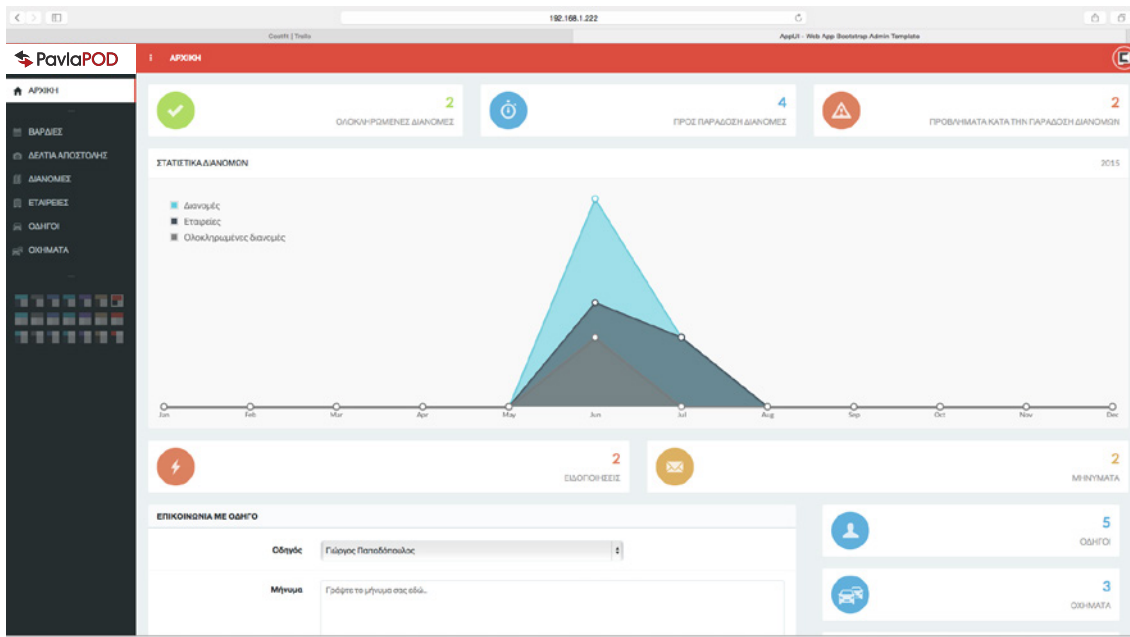

Upon delivery of the product, the driver can change delivery status and upload a photograph of the invoice or the product (to confirm that the package was delivered properly).

Benefits of the system

Beyond the obvious main benefit of the system which is the ability to monitor the deliveries in real time, our system has additional benefits such as:

- Reduce time and cost for the user
- Increase productivity
- Easy search for invoices - data

Γεώργιος Παπαδόπουλος	2015-06-16	11:13:45	00:00:00	The best car!

Management system

The system administrator can, on a daily basis (24/7), monitor the status of deliveries and have access to the following additional features:

- Monitor shift / driver
- Check delivery status
- View the number of completed deliveries
- Receive reports
- Send a message to the driver in real time
- View a list of companies, vehicles and drivers
- Submit new deliveries for the next day
